GRADES VARY WITH AVAILABILITY

*Monaghan Lumber tries to carry a large inventory, however; we cannot guarantee that all stock will be available at all times.

*Anyone, especially out of town customers, are encouraged to call to make sure stock is available.

*All drawings are as accurate as possible. There may be some minor variations.

ROUGH HARDWOOD BOARD FOOTAGE

- A board foot is the unit of measurement of rough lumber.
- A board foot is one foot long, one foot wide & one inch thick (or its equivalent).
- The formula is as follows: Thickness in inches x width in inches x length in feet divided by 12.
For example: 2" x 8" x 12' = 16 bd. feet.
- In hardwood we add 8% for shrinkage. 16 bf plus 8% = 17.58 bf.
